

## Best Practices for manufacturing of ceramic filter for drinking water

The **Potters for Peace** organization, promoter of the innovation **Filtron** has published on its website [www.pottersforpeace.org](http://www.pottersforpeace.org) the report *Best Practice Recommendations for Local Manufacturing of Ceramic Pot Filters for Household Water Treatment*. The document was drafted by the *Ceramics Manufacturing Working Group*, in collaboration with researchers and potters from different countries who participated in calls promoted during 2009 and 2010.

### [Best Practice Recommendations for Local Manufacturing of Ceramic Pot Filters for Household Water Treatment](#)

*Potters for Peace* is member of the International Network of Drinking Water Regulators of the World Health Organization and provides, since 1998, technical assistance and training for the production of low-cost water filters, contributing to increase sustainable employment in the following countries: Bangladesh, Benin, Cambodia, Colombia, Darfur, El Salvador, Guatemala, Ghana, Honduras, Kenya, Mexico, Nicaragua, Nigeria, Peru, Sudan, Somalia, Tanzania, Yemen and others.

The *Potters for Peace* website presents documents, publications, videos and reports on appropriate technologies and best practices for the production of ceramic filters using local materials and for their commercialization at local, regional and international level.
