

LOCAL ECONOMIC DEVELOPMENT AGENCIES INTRODUCE THEMSELVES THROUGH THEIR WEBSITES

By ILSLEDA
International links and services
for local economic development agencies

Several Local Economic Development Agencies associated to the [ILSLEDA Network](#) have a web page, for providing information about themselves and inviting national and international partners to establish swop relationships and to contribute to the development of their correspondent territories.

All these Agencies gather local public, private, and social actors for planning and realising, through their active participation, services, initiatives, and projects, which would allow valorising all the territorial resources in a sustainable way, and so energising the local economies.

On the LEDAs' websites you can find information about achieved results, ongoing projects, and the shared territorial development strategies, which provide ready and potential options for partnership initiatives among the LEDAs and new national and international partners.
