

## The Manual of CubaSolar for the design and construction of simple biogas plants

Cuba Solar's Portal for the Promotion of Renewable Energy and Environmental Respect, has published the Manual for the construction and design of simple biogas plants. This manual has been written by Jose Antonio Guardado Chacon. The Manual has been designed to provide basic knowledge to be taken into account when selecting, sizing and building a simple biogas plant, as well as to help develop *Arte del Biogas en Cuba*. The author has taken into consideration the experiences of users and technicians over recent years that through seminars and workshops exchanged and updated the prospects of biogas production in Cuba under the principle of sustainable development. These activities have involved institutions, centers and individuals from almost all parts of the country, as well as experts from other countries. *Arte del Biogas en Cuba* means the participatory and creative action of a wide sector of the Cuban population in the implementation and generalization of biogas technology, from features, possibilities and specific conditions.
