

The Training School (ECCA) for *Local Economic Development Agencies (LEDA)* and *Centres for Women's Entrepreneurship (CSEM)* launched their new website. Among virtual activities of the new website, ECCA has created, in collaboration with the Department of Virtual Education of the Rafael Landivar University (URL) and the International Cooperation Programme ILS LEDA that offered their experience and technical and methodological tools, a platform for training courses and virtual conferences online. Within this framework, IDEASS submitted innovations that could inspire ideas for innovative business in the Service Centres for women's entrepreneurship and Economic development agencies.
