

WINNERS OF THE 2018 EDITION ENERGY GLOBE WORLD AWARD

[Energy Globe announced the five winners of the 2018 edition of the Energy Globe World Award.](#) The winners received a prize for their work at an Award Ceremony that took place on January 28 and 29, 2019 in Yazd (Iran).

The Energy Globe Award distinguishes the best projects in five categories: earth, fire, water, air and youth.

The Energy Globe website presents [the winners of the 2018 Award for each category.](#) In addition to the five winning projects, coming from Germany, Kenya, India, Afghanistan and United States, the Energy Globe Award also recognized the important innovative contribution of other 11 projects declared as finalists and presented on the official Energy Globe website. These projects are implemented in Austria, Somalia, Denmark, Uganda, India, South Korea, Philippines, Afghanistan, Bangladesh, Nepal, Belize and Nigeria.

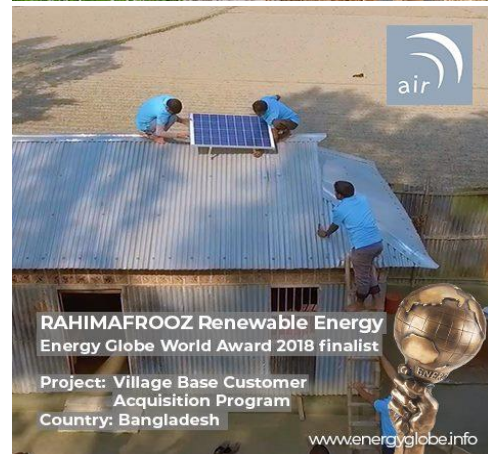

The aim of the Energy Globe is to raise global attention and to motivate people to also become active on sustainable, globally appropriate environmental solutions, ranging from high-tech to simple but highly efficient ones. Eligible for participation are projects with a focus on saving resources, improving air, soil, or water quality, increasing energy efficiency, using renewable resources, as well as all those giving a contribution towards the fight against climate change.

With more than 182 participating countries and over 2.000 project submissions annually, the Energy Globe Award is a prestigious environmental prize worldwide. Projects can be entered by individuals as well as companies, organizations, and public authorities. Several projects may be entered by a single competitor and entry is free of charge.

In addition to presenting the winners of the World Award, the Energy Globe website also allows to learn about the innovative proposals presented at the National Energy Globe Awards in collaboration with 182 participating countries.

The winner projects focusing on energy efficiency, renewable energies and the conservation of resources, are presented in their countries in cooperation with the Energy Globe partners. [These innovative projects can be found selecting the country of interest.](#)

The [Energy Globe Award for Sustainability was founded in 1999 in Austria.](#) The success of this initiative that celebrates its 20th anniversary, is demonstrated by the many participating

countries and by the wide range of innovative solutions presented on its website.

The winners of the Award are managing innovative solutions to common environmental problems that could be of interest for other territories and local development actors.
