

INTERNATIONAL ADVANCED COURSE FOR THE SPECIALIZATION IN DAIRY PRODUCTION

The [Pan American Dairy Federation FEPALE](#), the National Institute for Agricultural Research INIA of URUGUAY and the National Institute of Agricultural Technology INTA of ARGENTINA are organising the *International advanced course of specialization in dairy production*.

The course will be carried out with distance learning (e-learning) from May 4 to December 28, 2015.

In the Course presentation, FEPALE underlines that, with the increasing requirement of national and international markets for milk production, it has been more and more important to train professional milk producers and advisers, keeping them informed of latest updates concerning dairy production.

The course focuses on major issues about the dairy production, aiming to inform the participants of the latest developments and trends in this industry on various specific topics, and, at the same time, to create an exchange framework between teachers and participants from various countries and different realities.

The course will be organised in training units. The programme covers the main aspects related to dairy production, which will be discussed in depth in a pleasant and constant exchange mode. Topics of study include milking, quality, health, reproduction, genetics, nutrition, management, facilities, animal welfare and the environment.
