

# 14th PAN AMERICAN DAIRY CONGRESS

*More milk more health. We feed everybody*

The 14<sup>th</sup> [Pan American Dairy Congress](#) will be held from 25<sup>th</sup> to 29<sup>th</sup> April 2016 by the [Pan American Dairy Federation FEPALE](#) in collaboration with the competent institutions of Chile and several international partners, with the objective of generating a forum for discussing and exchanging knowledge as well as Pan-American and worldwide experiences related to the dairy sector.

The Congress will be held in Chile, at the *Centro de Convenciones Hotel Patagónico* in the City of Puerto Varas, involving the main actors of the entire dairy chain in the Americas and other parts of the world. All technical and scientific Congress sessions will have simultaneous translation in Spanish, Portuguese and English.

The meeting is aimed at promoting the production, processing and consumption of milk and dairy products, as a basic food for populations of the continent

The main role of the Pan-American Dairy Federation FEPALE is to support the interests of the different links of milk value chain. FEPALE gathers all the stakeholders of the sector: producers, dealers, industrialists, sellers, researchers, educators, government, private sector and others. In particular, FEPALE works for increasing the availability and the consumption of milk produced in the region.

The Congress, which is held every two years, represents a great opportunity to share and mobilize towards this goal to a wide variety of partners. In the 2016 Congress ensured its participation representatives from five continents, representatives of the dairy sector of the Latin American countries, representatives of FAO and specialized centers, companies and producer associations.
