

THE TRAINING COURSES OF PAN AMERICAN DAIRY FEDERATION FEPALE

One of the objectives of [Pan American Dairy Federation FEPALE](#) is to provide officers and technicians with the best training on the job in various stages of the dairy agribusiness chain.

To reach the objective the [Training Area of FEPALE](#) undertakes an important annual programme of training which includes various activities targeted to the sector (international courses, workshops and thematic sessions, daily events and meetings). It is intended to stimulate the exchange of knowledge and participants' experiences, and by extension, of the dairy sector in their countries.

The Training Area is organized in a training targeted to the Primary production sector and another focused on the Training in Industry. FEPALE Courses are supported by specialized institutions from different countries and partners of the Federation. In particular FEPALE raised a very good positioning through its at-distance training activities, thanks to Internet, which provide a wide access to professionals of various countries.

The FEPALE website presents insightful training activities scheduled in the coming months of 2016 in Panama, Costa Rica, Argentina and Cuba. Each course is presented with the details of its contents and specific organisational aspects, for the at-distance and the residential editions.
