

## THE *ARCIFILTRO* FOR WATER PURIFICATION IS BEING PRODUCED IN COLOMBIA

The Colombian Association of Clay and Allied Products (ASOPAFIN) in Ocaña produces and markets the clay filter *ARCIFILTRO*, being pioneer of this technology in Colombia with the support of OXFAM Great Britain and all its partners. The Association, founded in 2007 in the municipality of Ocaña, North of Santander Department, Colombia, is a producer and marketer of various products such as pottery, brick, tile, jars, pots, decorative items. The *ARCIFILTRO*, inspired by the *FILTRON* designed by Ron Rivera of *Potters for Peace* in Nicaragua, serves for water purification and to improve water quality for human consumption.

This product, of high-impact in public health, economic and easy to use, is now available also in Colombia.
