

LAUNCHED A NEW WEBSITE ON THE CERAMIC WATER FILTER PRODUCED IN NICARAGUA

Filtron, the filter factory in Jinotepe, Nicaragua, has launched a [new bilingual website](#) that has some useful information, including a manual on the use and maintenance of a ceramic water filter.

In Nicaragua, the [Organization Potters for Peace](#) of Ron Rivera has managed to bring these filters to the 17 departments in the country, improving health and quality of life of thousands of people.

Also thanks to the acknowledgements of the World Health Organization, the Filtron is being used in several Countries of Latin America and other continents. On the website of the Potters for Peace, brochures of presentation of the characteristics of the Filtron can be found. These brochures can satisfy the interest of the local actors that would like to know more about this technology, in view of its utilization.
