

## THE CERAMIC WATER FILTER OF POTTERS FOR PEACE IS BEING PRODUCED IN 18 COUNTRIES

The organization [Potters for Peace – Ceramistas por la Paz](#) continues promoting the ceramic water purifier Filtrón.

The Filtrón neutralizes bacteria, removes turbidity in water, does not need electricity to operate, filters up to 36 litres per day, ensures clean water for 24 months, it is easy to use and maintain, is locally produced at low cost.

The main characteristics of this water filter can be found in the web page of the Filtrón Company operating in Nicaragua. [This website in Spanish and English](#) also presents a manual on the use and maintenance of the ceramic water filter.

*Potters For Peace*, in collaboration with the Filtrón Company of Nicaragua, thanks to the acknowledgements of the World Health Organization and other important international institutions, is now implementing the production and the use of Filtrón in [18 countries of Latina America, Africa and Asia](#).

Technical materials and information about the Filtrón can be found in the website of *Potters for Peace* in view of the utilization of this innovative technology.
