

# 10th CONGRESS OF RedBioLAC BIODIGESTERS NETWORK FOR LATIN AMERICA AND THE CARIBBEAN

## LIBRARY ON BIODIGESTERS

From 17<sup>th</sup> to 21<sup>st</sup> September, 2018, the [10th Congress of the RedBioLAC biodigesters Network for Latin America and the Caribbean: \*promoting sustainable territorial development and integration through biogas\*](#) was held with great success in Foz de Iguazú (Brazil).

166 technicians and experts from Brazil, Germany, Argentina, Bolivia, Chile, Colombia, Costa Rica, Ecuador, United States, Honduras, Mexico, Paraguay, Peru and Uruguay participated in the Meeting.

The organizers of the RedBioLAC Meeting have already published on the website the presentations made by the participants in the different sessions, building in fact an updated bibliography of great value on biodigesters, available to all interested parties.

In particular, from the site you can download:

- 6 presentations made in the *Introductory Course: Small-scale biodigesters*
- 8 presentations made in the *Introductory Course: Large scale biodigesters*
- 24 presentations made at the *International Congress of RedBioLAC*

The Posters also present brochures and informative materials of great interest, coming from the different experiences that have participated in the Meeting.

The Congress is one of the RedBioLAC initiatives to promote biodigesters as an excellent technological alternative for treatment of waste from human activity in urban and rural areas. RedBioLAC stresses that by producing energy and fertilizer, biodigesters contribute to the fight against climate change by mitigating greenhouse gases and reducing the use of synthetic fertilizers.
