

6th CONGRESS OF REDBIO LAC BIODIGESTERS NETWORK FOR LATIN AMERICA AND THE CARRIBEAN

From 10th to 15th of November 2014 the 6th RedBioLAC Congress will be held in Cali (Colombia). The Meeting is organized by the [Centro CIPAV](#), with the support from [REDBioCOL](#) (Colombian Biomass Energy Network) and [REDBioLAC](#) (Biodigesters Network for Latin America and the Caribbean).

The Congress, which will take place at the headquarters of COMFENALCO in Cali, is organized as follows:

- A practical and theoretical course on biogas digesters from 10th to 12th of November, which includes a field biodigester installation.
- The International Conference from 13th to 15th of November.
- The REDBioLAC Assembly Board members.
- Field visits, complementing the international congress.

Alongside the expansion of the network of international organizations that support the development of biodigester technologies also REDBioLAC is expanding its professional network by involving study centres and institutions interested in adopting these low-cost technologies with high-impact in rural areas.

In particular the creation of national networks like REBioCOL in Colombia ensures an extension of the impact of these technologies on rural populations. In the section of the web page which presents REDBioLAC national networks you can find further information about [current initiatives in different countries](#).

The website of REDBioLAC network presents an extensive technical documentation on biodigesters and the several advantages deriving from its use. A specific section provides some selected links to consult [recommended international institutions](#) active in biodigesting systems. The website also presents useful documents for the promotion of these technologies and the many advantages in using them.

The 5th Network Meeting of REDBioLAC was held in October 2013 at Zamorano University in Honduras, with the participation of professionals from Nicaragua, Peru, Chile, Argentina, Mexico, Honduras, Cuba, Costa Rica, Mozambique, Germany, the Netherlands, Cambodia, Colombia, Peru, Bolivia, Spain, USA, Switzerland, Guatemala, Panama, Tanzania and France.
