

# RESULTS OF THE 6th CONGRESS REDBIOLAC BIODIGESTERS NETWORK FOR LATIN AMERICA AND THE CARIBBEAN

From 10<sup>th</sup> to 15<sup>th</sup> of November 2014 the 6th RedBioLAC Congress has been held in Cali (Colombia). The Meeting was organized by the [Centro CIPAV](#), with the support from [REDBioCOL](#) (Colombian Biomass Energy Network) and [REDBioLAC](#) (Biodigesters Network for Latin America and the Caribbean).

More than 110 participants from 15 countries took part to the Meeting, developing the following activities:

- A theoretical and practical course on Biogas and biodigesters. During the course the experts presented the technology and how to use biogas for thermal usage, power generation and cogeneration. They provided examples of using biol and their applications in different cultures, at different scales and examples of devices that are used with this fuel, such as lamps, stoves, heaters, among others.
- A practical exercise of installing a biodigester.
- The International Congress, which featured high technical presentations and examples of projects where the digester is inserted into systems finalized to recycle all types of waste.

REDBioLAC is developing the report of the International Congress and this material will be published on [REDBioLAC website](#).

The website of REDBioLAC network presents an extensive technical documentation on biodigesters and the several advantages deriving from its use. A specific section provides some selected links to consult [recommended international institutions](#) active in biodigesting systems. In the section of the web page which presents REDBioLAC national networks you can find further information about [current initiatives in different countries](#).
