

# RINCONES DEL ATLÁNTICO PROMOTES ORGANIC FARMING IN CANARY ISLANDS

[Organic farming](#) is one of the important issues of the catalogue of natural resources and cultural heritage of the Canary Islands, realized by [Rincones del Atlántico](#).

In the section dedicated to organic farming, interesting articles on traditional products and practices aimed at their conservation and enhancement can be found.

One article presents history and experience of the eco-organic vineyard [Finca La Hornaca in Tenerife](#) ([new link about the eco-organic vineyard](#)). Red wine *Hoya del Navío 2011* has earned a bronze medal in the sixth edition of the prestigious International Organic Wine Contest *Challenge Millésime Bio 2013*, held in Montpellier, France, which received 1070 samples from around the world. [This prestigious award](#) valorises the work of pioneering organic farmers in Tenerife and the work to promote innovative trends carried out by *Rincones del Atlántico*.

Other interesting subjects in the catalogue of *Rincones del Atlántico* on organic farming: [The Canary Seed Network keep growing local cultivars](#); [Agricultural biodiversity to enhance our productions and farmers](#).

In the 14 sections of the *Rincones del Atlántico* catalogue, themes such as traditional architecture, green building, renewable energy, culture and landscape can be found, such as information on technologies that can be of universal interest
