

INTERNATIONAL SUMMER SCHOOL OF AGRO ECOLOGY

The Technology Platform of TP Organics is promoting the *International Summer School of Agroecology, (ISSAE)*, an opportunity for the participants to meet different experiences and skills and learn from each other. The School is enriched by the contributions of researchers who will lead the participants to clarify and develop an agro ecological approach in the management of socio-ecosystems.

The Summer School, organized in collaboration with high level [institutional and technical partners](#), will take place in Toulouse (France) from 8 to 12 July 2013, in the premises of the *Ecole Nationale de Formation Agronomique (ENFA)*.

In the *Agroecology School* web site the objectives of the initiative, the detailed program and the past experiences results can be found.
