

ACTION PLAN FOR INNOVATION AND LEARNING OF TP ORGANICS PLATFORM

The [European Technology Platform of TP Organics](#) is promoting the new [Action Plan for Innovation & Learning](#) developed in cooperation with IFOAM and European Union initiatives. The Action Plan sets out a blueprint for learning and innovation in the organic and agro-ecological food & farming sector.

The document analyses what opportunities EU policy instruments offer for multi-actor projects or thematic networks to build strategic partnerships and underline that their success will depend on the political will and capacities available to implement the new thinking on innovation.

The Action Plan presents the Territorial Bio-Districts as an example of innovation on organic farming and multi-actors approach.
