

CALL FOR PROPOSALS TRANSDISCIPLINARY RESEARCH TOWARDS MORE SUSTAINABLE FOOD SYSTEMS

The European Technology Platform TP Organics is spreading information about the interesting call for proposals [Thought for Food Initiative. Transdisciplinary research towards more sustainable food systems](#)

Launched by [Agropolis Fondation](#), [Fondazione Cariplo](#) and [Fondation Daniel and Nina Capasso](#) the Call aims to advance understanding of the sustainability of food systems and explore innovative solutions that could help actors involved to achieve it; facilitate the emergence of excellent, new and high-impact research activities; and generate a leverage effect that encourages new collaboration between different types of disciplines with a specific focus on combining natural and social sciences, and that are inclusive of diverse stakeholders.

The Call will support research projects, including those with a capacity building component in any of the following thematic strands (or a combination of both):

- Diverse agricultural production for more sustainable food systems and diets; and
- Sustainable food processing for more sustainable and healthy diets.

Application for funding under this Call will undergo a “two-stage process.” Applicants will first have to submit a Concept Note (CN) for review. Proponents of selected CN shall be asked to submit a Full Proposal (FP).

Eligibility is not subjected to any geographical limitation. The deadline for submission of Concept Note is on 29 February 2016.
