

SCIENCE DAY FOR ORGANIC SECTOR AT BIOFAC 2017 TO DEFINE NEW TP ORGANICS STRATEGY

In 2017, [TP Organics, European Technology Platform for Organic Food and Farming](#), celebrates its 10th anniversary. It will be a year to review what TP Organics has been achieved so far and to develop a new long-term strategy. To make this new strategy, a workshop will be held at BIOFACH Science Day. The Science Day is a joint event TP Organics and [TIPI - Technology Innovation Platform of IFOAM - Organics International](#).

During the Science Day, the [TIPI workshop](#) “100 questions to be addressed by novel organic food and farming systems” will take place. Building on the vision and strategic action plan of TIPI, this workshop will identify the research gaps in organic food and farming systems in the context of international cooperation. The discussions of this workshop will also help to format a new plan of action for the TP Organics Technology Platform.

TIPI, the Technology Innovation Platform of the International Federation of Organic Agriculture Movements is a research action network of IFOAM. It was established at the TIPI Member Assembly on February 2013 during BIOFACH, the World Organic Trade Fair, at Nuremberg, Germany.

TP Organics is the European Technology Platform for organic food & farming, uniting large companies, small & medium enterprises, researchers, farmers, consumers and civil society organisations active in the organic value chain from production, input & supply, to food processing, marketing and consumption.
