2017 EDITION OF THE ORGANIC INNOVATION DAY ORGANIZED BY THE EUROPEAN TECHNOLOGY PLATFORM

The <u>European Technology Platform TP Organics</u> is spreading information about the 2017 edition of the Organic Innovation Day. The registration for the event will open in mid-August.

On 15-17 November 2017, the 3rd edition of the <u>Organic</u> <u>Innovation Days</u> will be held in Brussels. The event will gather actors from organic and conventional food & farming sector as well as policy-makers to discuss the latest innovation in agriculture and food, in organics and beyond.

This year's edition is enriched with the <u>OK-Net Arable</u> Final Conference where the best practices to improve yields in organic farming will be presented followed by a discussion on knowledge exchange and innovation support in organic farming. In addition, a session to foster organic actors' participation in joint research projects will be held on the last day of Organic Innovation Days.

In the meantime, farmers, researchers or companies that have developed innovative solutions that fit into one of the theme below can submit them to the <u>Call for Organic</u> <u>Innovations</u> before 31 July 2017.

These are the themes of the 2017 Call that are based on the priority topics identified in <u>TP Organics Strategic Research</u> and Innovation Agenda:

- Improving soil quality in organic arable farming
- Appropriate and robust livestock systems
- Innovation for sustainable diets
