

The Appropriate Technologies Catalogue of *Soluciones Prácticas* organization from Peru

The [Soluciones Prácticas Website](#) contains sheets on technologies or processes about high-priority areas of interest on development, such as energy, agribusiness, environment, water management and sanitation, irrigation, and agriculture.

Soluciones Prácticas is an international technical cooperation organization, which contributes to sustainable development for disadvantaged people, through research, implementation and dissemination of technologies that can be managed by local actors. *Soluciones Prácticas* was established in Peru in 1985 and is part of the international organization Practical Action founded in London in 1965.

The sheets of the technologies presented in this website may be of interest to any actor of territorial development.
