

# International interest generated by the Agricultural Towers for multi-layer cultivation

By Jean-Claude Rey

Agricultural Towers for multi-layer Cultivation have been promoted in France and at the international level by Courtirey enterprise during different events and exhibitions in 2010 and 2011.

The great interest shown was generated by the extremely good results of such an innovative solution. The photo on the right side of the page shows the agricultural tower installed in Viry (France) managed by farmer Mr. Gerard Ducrey. In this tower for multi-layer cultivation, measuring 12 square metres, 250 kg of tomatoes and 300 kg of salad were produced in 6 months.

Towers for multi-layer cultivation have been selected among 800 French enterprises and the innovation of has been awarded in the "Production Process category" of the Innovation Craft Contest called "ARTINOV", organized by the French Chamber of Arts and Crafts (CMA). The contest aims at rewarding the economic potential of the company as well as its creativeness and ability in undertaking innovative projects for development.

On May 7th, 2011, at the International Showroom of Inventions in Paris, Jean-Claude Rey was awarded the Truffaut prize; the Paris Mayor's Cup; a gold medal and a medal conferred by the Minister for Overseas Territories during the prestigious LEPINE International Contest organized by the French Inventors and Manufacturers Association. The Agricultural Towers have been selected among more than 500 inventions in 14 countries. The contest awards the most ingenious innovation of the year and it is for private individuals or entities engaged in creation and innovation.

Several projects are being implemented in France, Japan and Arab States of The Gulf. In El Salvador, two Local Economic Development Agencies formulated, with the support of the inventor and the ECCA (Training School for ADEL and CSEM), two pilot projects for Agricultural Towers and identification of required resources are underway with international cooperation organizations operating in the country.
