

BIOFACH WORLD'S LEADING TRADE FAIR FOR ORGANIC FOOD 2025

RESULTS AND NEXT WORLD EXHIBITIONS

BIOFACH, World Leading Trade Fair for Organic Food, closed its doors in Nuremberg (Germany) after four successful days. It brought together more than 35,000 visitors from 140 countries between 11 and 14 February 2025. Every second participant came from abroad. They visited around 2,300 exhibitors from 94 countries to find out about the wide range of products on offer in the organic world.

BIOFACH has been the important business event for the organic sector since 1990 and the meeting place for trade visitors from the organic sector coming from hundreds of countries, with regional, national and international stakeholders from the entire value chain which every year meet to forge a more sustainable future. The event's international patron is IFOAM Organics International, and the national supporting organization is the German Federation of Organic Food Producers (BÖLW).

In 2025 BIOFACH confirmed itself as a diverse exhibition program with a wide range of products inviting visitors to explore organic food and industrial trends, with a focus on holistic circular systems and regenerative agriculture based on organic farming, which are of growing importance to protect climate and to care for personal and planetary health.

The BIOFACH Congress 2025 focused on the theme *Yes, we do! – How to effect change in the organic food segment.* These and other questions relating to the ecological transformation were discussed in 171 sessions. Participants particularly appreciated the choice of topics, which were precisely tailored to the needs of the sector. The best-attended panel was "The German organic market - facts, figures and analysis 2025", with 200 interested participants. The focus topic "Yes, we do!" was also reflected in numerous supporting events. Countless participants experienced and tasted the product trends at BIOFACH 2025 during the guided tours through the exhibition halls. The topics relating to out-of-home catering were also very popular once again. Best-practice examples were used to give participants a deeper insight into community catering. In the Sustainable Future Lab, the sector's pressing issues were discussed in order to find solutions for the transition towards more organic food.

Between the current developments and emerging trends in the organic food, the BIOFACH event has highlighted that in recent years, canteens have developed into much more than just places to eat. Today, they are central meeting places with enormous influence: they provide millions of people

with food every day. As a result, they have great potential to promote responsible consumption, creative menus and resource-saving concepts. However, the challenges of implementing sustainable canteen concepts are still great. The following examples from Mercedes-Benz, Community Kitchen & Co. show how better food is possible in out-of-home catering (OOH) - and how canteens can become drivers of a new food culture.

As in the previous editions, BIOFACH World 2025 had a global presence presenting the results of the BIOFACH events in China, India, Japan, South America, Thailand, the USA and Saudi Arabia bringing together exhibitors and trade visitors.

[The webpage of BIOFACH World presents the next exhibitions planned to be held in 2025 in these key economic regions of the world to promote the development of regional organic markets.](#) Under the patronage of IFOAM Organics International, BIOFACH guarantees the constant high quality of the exhibits through strict admission criteria at all exhibitions worldwide. All exhibits originating from agriculture, including aquaculture, are certified to the accreditation directives of the IFOAM Family of Standards, officially endorsed as organic by the organic movement. These exhibitions are the meeting places for supply and demand, raw materials and convenience products, manufacturers and buyers, as well as politics and media, to promote the change for sustainable food systems. BIOFACH World invites all interested parties to participate in these events.

BIOFACH AMERICA: International Trade Fair for Organic Products. Atlanta, Georgia, USA June 2 – 4, 2025

The US organic market is the largest worldwide. In 2022, organic food sales totaled USD 61.7 billion. Over the past 10 years, organic sales have more than doubled as Americans are eating and using more organic products than ever before. With BIOFACH AMERICA we will host the US's only purely organic trade show in Atlanta, Georgia, in June 2025, where the whole organic value chain will be covered: from organic farming to retail [to BIOFACH AMERICA](#)

BIOFACH AMERICA LATINA - BIO BRAZIL FAIR: International Trade Fair of Organic Products and Agroecology. São Paulo, Brazil June 11 - 14, 2025

The awareness of healthy and organic food has structured food trade. Latin America is the third largest region of organic land worldwide with organic sales in Brazil amounting to around EUR 1 billion in 2022. BIOFACH AMERICA LATINA co-located with BIO BRAZIL FAIR and Naturaltech opens its doors for all members of the organic movement in Brazil who want to explore new distribution channels. BIOFACH CHINA: International Organic Trade Fair and Conference. Shanghai, China. June 11 – 13, 2025

Growing market with high demand for safe food. Based on the FiBL survey issued during BIOFACH, China is the third-largest market for organic food. After 17 years of development, BIOFACH CHINA has accumulated a large number of professional visitors with a qualified organic background and will help the global organic producers to establish deep links with Chinese buyers. [to BIOFACH CHINA](#)

BIOFACH INDIA: International Organic Trade Fair and Conference. Delhi-NCR, India. Autumn 2025

Organic market on the rise with growing buying power. The Indian organic food market is expected to grow at a CAGR of 25.25 % during 2022 – 2027, with increasing demand for herbs, spices-based value-added products and millets. The pandemic has provided a welcome boost to India's growing preference for organic foods and goods. Organic food sales have skyrocketed since March 2020, reflecting a shift in consumer values. BIOFACH INDIA is more than a trade fair and networking platform, it supplements knowledge and education through a series of programs and expert-talks. [to BIOFACH INDIA](#)

BIOFACH JAPAN: International Organic Trade Fair and Conference. Tokyo, Japan. September 26 - 28, 2025

Japan: A niche market with high potential. Japan's low share of arable land leads to high demand of imported organic food and beverages. As the country continues to globalize and Japanese consumer awareness of organic as a concept grows, there is significant potential for new growth. The forecasted organic food market value by 2026 is 1.94 billion USD. BIOFACH JAPAN is the ideal platform for international suppliers from overseas to make use of the great sales opportunities for organic products. [to BIOFACH JAPAN](#)

BIOFACH SAUDI ARABIA: International Organic Hub for the MENA region. Riyadh, Saudi Arabia. November 10 - 12, 2025

High potential market and rising demand for organic food. The organic sector in the Middle East and North African region is developing fast. The MENA organic food market was valued at USD 7 billion in 2022 and is expected to witness significant growth in the coming years. As one of the largest countries in the region, Saudi Arabia is investing heavily in the development of the organic sector – from rural production to shelf – and identifies this as one of the most important keys for the future. [to BIOFACH SAUDI ARABIA](#)

BIOFACH SOUTH EAST ASIA: International Organic Trade Fair and Conference.

Gateway to the South East Asian organic market. This market will play a major role in the future, both nationally and internationally, and various political initiatives are established to support this growth – BIOFACH SOUTH EAST ASIA is reflecting the organic scene in the entire region. [to BIOFACH SOUTH EAST ASIA](#)

From 10-13 February 2026, the Nuremberg Exhibition Centre will once again be the place where the international organic food and natural cosmetics industry comes together.
