

# BIOFACH WORLD'S LEADING TRADE FAIR FOR ORGANIC FOOD 2026

## RESULTS AND NEXT REGIONAL EXHIBITIONS

March 2026

[BIOFACH, the World Leading Trade Fair for Organic Food, closed its doors in Nuremberg \(Germany\) after four successful days.](#) BIOFACH 2026 confirmed its role as the world's leading platform: around 2,200 exhibitors and almost 32,000 trade visitors ensured intensive discussions, clear orientation, and strong impetus for the future of the organic sector. The congress, trends, and startups demonstrated how resilient and dynamic the sector is.

BIOFACH has been an important business event for the organic sector since 1990 and the meeting place for trade visitors from the organic sector coming from hundreds of countries, with regional, national, and international stakeholders from the entire value chain who every year meet to forge a more sustainable future. The event's international patron is [IFOAM Organics International](#), and the national supporting organization is the [German Federation of Organic Food Producers \(BÖLW\)](#).

[During four days of trade fair, BIOFACH has once again confirmed its role as the world's leading platform for organic food.](#) The focus was on the quality of intergenerational encounters and the question of how food systems can become resilient and sustainable in line with the theme "Growing Tomorrow: Young Voices, Bold Visions!" Around 2,200 exhibitors from almost 90 countries and just under 32,000 trade visitors took part in BIOFACH 2026. Half of them traveled from abroad. The trade fair reached its relevant target groups and facilitated intensive discussions between manufacturers, retailers, politicians, and stakeholders.

The motto "Growing Tomorrow: Young Voices, Bold Visions!" set the tone for the content of the BIOFACH Congress and emphasized the importance of young perspectives, new ideas, and intergenerational dialogue for the further development of the organic sector. At the same time, the congress reflected the current issues and challenges facing the value chain across its entire thematic spectrum, from market development and consumer perspectives, to production and supply chains to corporate strategies, politics, science, and sustainability. In forums, panels, and formats such as the SustainableFutureLab, discussions focused on how organic farming can continue to grow, what obstacles the industry currently faces, and what solutions can be derived from this.

[Underlining the international appeal of BIOFACH, India was celebrated as the country of the year in 2026](#), where it received particular attention. The country showcased its growing organic expertise, export strength, and diversity ranging from rice and spices to legumes and millet. At the APEDA joint stand, 95 exhibitors presented the breadth of organic farming and the role of young players in a growing market. India has become one of the most important players in the global organic market. With more than 4 million organic producers and millions of hectares of agricultural land, the country is shaping the sustainable food market worldwide.

As in the previous editions, BIOFACH World 2026 had a global presence through the results of the exhibitions connecting organic marketplaces with international demand in key economic regions of the world.

[The webpage of BIOFACH World presents the next exhibitions planned to be held in 2026 in these key economic regions of the world to promote the development of regional organic markets](#). Under the patronage of IFOAM Organics International, BIOFACH guarantees the constant high quality of exhibits through strict admission criteria. All exhibits originating from agriculture, including aquaculture, are certified according to the accreditation directives of the IFOAM Family of Standards, which contain all standards officially endorsed as organic by the organic movement. These exhibitions are meeting places for supply and demand, raw materials and convenience products, manufacturers and buyers, as well as politics and media, to promote change towards sustainable food systems. BIOFACH World invites all interested parties to participate in these events.

**BIOFACH AMERICA:** International Trade Fair for Organic Products. Atlanta, Georgia, USA.

A fast-growing market – highly diversified. The US organic market is the largest worldwide. In 2022, organic food sales totaled at USD 61.7 billion. Over the past 10 years, organic sales have more than doubled as Americans are eating and using more organic products than ever before. BIOFACH AMERICA is the only trade fair in the USA dedicated exclusively to organic products, covering the entire organic value chain: from organic farming to retail. [BIOFACH AMERICA](#).

**BIOFACH AMERICA LATINA – BIO BRAZIL FAIR:** International Trade Fair for Organic Products and Agroecology. São Paulo, Brazil. June 10 – 13, 2026.

The awareness of healthy and organic food is driving the development of a more structured food trade. Latin America is the third largest region of organic land worldwide with organic sales in Brazil amounting to around EUR 1 billion in 2022. BIOFACH AMERICA LATINA co-located with BIO BRAZIL FAIR and Naturaltech opens its doors for all members of the organic movement in Brazil who want to explore new distribution channels.

[BIOFACH AMERICA LATINA - BIO BRAZIL FAIR](#).

**BIOFACH CHINA:** International Organic Trade Fair and Conference. Shanghai, China. May 18 – 20, 2026.

Growing market with high demand for safe food. Based on the FiBL survey issued during BIOFACH, China is the third- largest market for organic food. After 18 years of development, BIOFACH CHINA has accumulated a large number of professional visitors with a qualified organic background and will help the global organic producers to establish deep links with Chinese buyers. [BIOFACH CHINA](#).

**BIOFACH INDIA:** International Organic Trade Fair and Conference. Delhi-NCR, India. August 6 - 8, 2026.

An organic market on the rise with growing buying power. The Indian organic food market is expected to grow at a CAGR of 25.25 % during 2022 – 2027, with increasing demand for herbs, spice-based value-added products and millets. The pandemic has provided a boost to India's growing preference for organic foods and goods. Organic food sales have skyrocketed since March 2020, reflecting a shift in consumer values. BIOFACH INDIA is more than a trade fair and networking platform, it supplements knowledge and education through a series of programs and expert-talks. [BIOFACH INDIA](#).

**BIOFACH SAUDI ARABIA:** International Organic Hub for the MENA region. Riyadh, Saudi Arabia. November 2026.

A high potential market and rising demand for organic food. The organic sector in the Middle East and North Africa region is developing fast. The MENA organic food market was valued at USD 7 billion in 2022 and is expected to witness significant growth in the coming years. As one of the largest countries in the region, Saudi Arabia is investing heavily in the development of the organic sector – from rural production to retail shelf – and identifies this as an important key for the future. [BIOFACH SAUDI ARABIA](#).

From 16 - 19 February 2027, the Nuremberg Exhibition Centre will once again be the place where the international organic food industry comes together at the World Leading Trade Fair for Organic Food, BIOFACH 2027.
