

# ENERGY GLOBE WORLD AWARD – APPLICATION FOR 2023 AND WINNERS OF THE 2022 EDITION

In November 2022, the Energy Globe Foundation announced the winners and finalists of the [2022 edition of the Energy Globe World Award for Sustainability](#).

The website also announces that application to the Energy Globe Award 2023 is open and submission deadline is February 14, 2023.

With more than 180 participating countries, the Energy Globe Award is a prestigious environmental prize. The objective is to recognize innovative solutions for environmental problems from across the globe and to promote them informing and motivating people and economic players to join in their implementation. These solutions are chosen in the categories of Life: Earth, Fire, Water, Air and Youth.

The 2022 Edition of the Energy Globe World Award recognized five projects as winners for each category. In addition, the Award also recognized the important innovative contributions of 10 projects declared as finalists, developing activities in Czech Republic, Ethiopia, Switzerland, Portugal, Jordan, Slovenia, Austria, Canada, Spain and Venezuela.

[Winners and finalists of the 2022 Edition of the Energy Globe Award](#) are the following projects:

- [Nurture.farm, AgTech Startup](#). India. Crop Residue Management to eliminate paddy crop stubble burning.
- [ARC Power](#). Rural Mini-Grids. Rwanda. Environmentally friendly and affordable solution for power supply based on decentralized mini-grids that are operated in a modular manner using solar energy.
- [Eco Panplas](#). Brazil. Contaminated Plastic Packaging Recycling without using water and without waste generation.
- [LanzaTech](#). China. New technology that uses microorganisms to convert the carbon emissions from agricultural and industrial processes into ethanol for cars, kerosene for airplanes or synthetic fibers for the textile industry.
- [Take 3 for the Sea](#). Australia. Global initiative to motivate young people to behave in respectful way towards the environment, with a focus on avoiding or collecting plastic waste.

National winning projects focusing on energy efficiency, renewable energies and the conservation of resources have also been identified in more than 90 participating countries, in cooperation with the Energy Globe partners. In these countries, all project submissions are eligible for both participation on a national and global basis. [These winning innovative projects can be found selecting the country of interest.](#)

The Energy Globe Award [has been organized since 1999 by the Energy Globe Foundation from Austria.](#) The aim is to raise global attention and to motivate people to become active on sustainable, globally appropriate environmental solutions, ranging from high-tech to simple but highly efficient ones. Eligible for participation are projects with a focus on saving resources, improving air, soil, or water quality, increasing energy efficiency, using renewable resources, as well as all those giving a contribution towards the fight against climate change.

In the Energy Globe website all useful information will be available to participate in the 2023 edition of the Award. Every individual, private or public institution, company or NGO can submit one or multiple projects. The participation is free of charge. [The submission deadline is February 14, 2023.](#)
