

FUNDS FOR NGOs

A TOOL FOR SUSTAINABILITY WITH A GLOBAL IMPACT

The [Funds for NGOs – Grants and resources for Sustainability](#) social enterprise continues in its work of providing online information for NGOs, enterprises and startups to increase their awareness and access to donors, resources, and skills. It uses its technology to spread knowledge from its experienced fundraising experts to NGOs around the world and increase their capacity and impact.

Within Funds for NGOs' website, the section [latest funds for NGOs](#) provides access to different funding opportunities for NGOs and individuals including call for proposals, call for applications, request for proposals and expression of interest, according to a wide range of specific thematic areas such as agriculture, environmental conservation, education, water, sanitation and hygiene, poverty alleviation, youth empowerment, gender.

The section [latest funds for companies and startups](#) - stimulation success and sustainability provides access to different financial and technical opportunities to improve the work of companies, businesses, entrepreneurs and startups through accelerators, incubators, mentorship and training activities. This section also presents [competitions and prizes](#) promoted in specific countries or at global level.

[Funds for NGOs is an innovative social enterprise](#) started in 2008 and based in New York (United States), that provides users with free alerts on funding availability. Now their website consistently generates millions of page views and they have grown also to create free resource guides on topics such as writing proposals for funds, capacity building, donor networking, using technology and social media.

This online initiative is an important tool increasing the sustainability of NGOs, enterprises and startups across the world. Through the many opportunities presented concerning different countries it can also represent a very useful tool for companies or NGOs that develop innovative solutions for sustainable local development or that intend to apply innovative approaches created by other countries in their local context.
