

2026 EDITION OF THE ORGANIC INNOVATION DAYS

ORGANIZED BY TP ORGANICS EUROPEAN PLATFORM

August 2026

[The European Technology Platform TP Organics](#) is spreading information about the 2026 Edition of the Organic Innovation Days, bringing together researchers, policymakers, practitioners and innovators to discuss how research and innovation can contribute to a more competitive and future-resilient Europe through organic and agroecological approaches.

The 2026 edition will take place on 3-4 November in the Organic House in Brussels (Rue Marie-Thérèse 11) for the only EU event dedicated to organic and agroecological research and innovation.

Organized by the TP Organics Platform, the 2026 edition will bring together researchers, farmers, businesses and policymakers to discuss how research and innovation can drive the transition towards more sustainable, resilient and competitive food systems in Europe.

In particular, the Organic Innovation Days 2025 will provide an opportunity for:

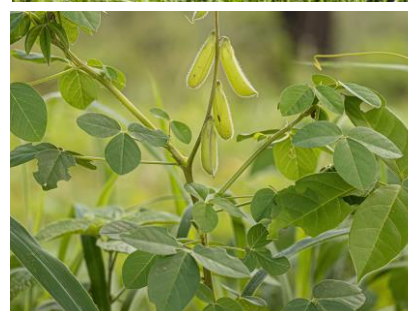

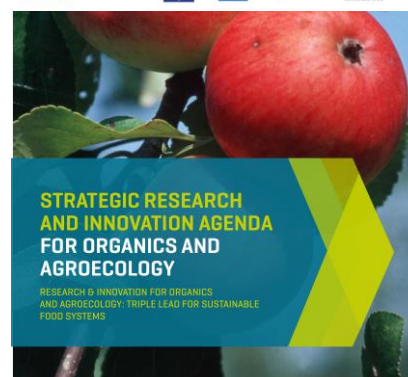

- Discussions on the future of the next Horizon Europe Framework Programme (FP10) and the European Competitiveness Fund (ECF);
- Insights from innovative Horizon Europe projects, including [WINN-ORGANIC](#) and [InnOFoodLab](#) projects;
- Interactive workshops and policy debates;
- Valuable networking opportunities with key stakeholders from across the organic and agroecological sector.

Organic Innovation Days will be the place for researchers, practitioners, policymakers or business representatives to connect, exchange ideas and help shape the future of sustainable food systems in Europe. The updated programme will be available closer to the event on the [TP Organics webpage](#). Find out more about the past editions of the Organic Innovation Days: [2025](#), [2024](#), [2023](#), [2022](#), [2021](#), [2020](#), [2019](#), [2018](#) and [2017](#).

TP Organics is the European Technology Platform (ETP) for organic food & farming, uniting large companies, small & medium enterprises, researchers, farmers, consumers and civil society organisations active in the organic value chain from production, input & supply, to food processing, marketing and consumption.
