

APPLICATION IS OPEN FOR THE ENVIROGRANT 2024 PROMOTED BY VEOLIA
WITH THE STAFFORDSHIRE COUNTY COUNCIL IN UNITED KINGDOM

[Applications for EnviroGrant 2024 are open](#) and the closing date is Monday 6th May at 12pm. The EnviroGrant Scheme has been set up by Veolia in partnership with the Staffordshire County Council to support Staffordshire's communities to reduce waste and to be more sustainable, with grants of up to £1000.

The funding is open to properly constituted, not-for-profit local organizations, including charities, societies, voluntary and community groups and schools.

Funding is available for projects which:

- Reduce waste disposal
- Increase recycling
- Increase re-use

Examples of the sorts of projects which would be eligible for funding: Community food gardens; Composting; Surplus food use e.g. community larders and fridges; Repair cafes; Clothes swaps; Library of Things, Waste Education and Workshops.

Funding of up to £1000 can be applied for a small project or to deliver an element of a larger project. All applications will be assessed against a standard set of criteria. Applications that clearly demonstrate how the project contributes to reducing waste will score more favourably.

Veolia work in partnership with Staffordshire County Council. Since October 2013 they have been operating a state of the art Energy Recovery Facility, turning Staffordshire's waste that is difficult to recycle or compost into electricity, enough to power 66,000 homes.

In the United Kingdom, as a leader in environmental solutions, Veolia provides a comprehensive range of waste, water and energy management services designed to build the circular economy and preserve scarce raw materials. They are innovators committed to focusing on carbon reduction by preventing pollution, preserving natural resources, protecting biodiversity, combating climate change and raising environmental awareness.

At international level, Veolia is also one of the world's leading providers of waste management and cleaning services. Their activities include the collection, treatment and recycling of solid, liquid and hazardous waste in the municipal, industrial, marine and commercial markets. They serve more

than 87 million people worldwide across 55 countries. As part of their integrated approach to waste, they operate a number of technologically advanced solutions that are able to convert waste into a valuable energy resource that would otherwise result in the use of fossil fuels.

The Enviro Grant initiatives represent one of the activities that Veolia supports internationally with the aim of spreading the culture of waste management through a circular economy approach.
